Good Selection of Holly

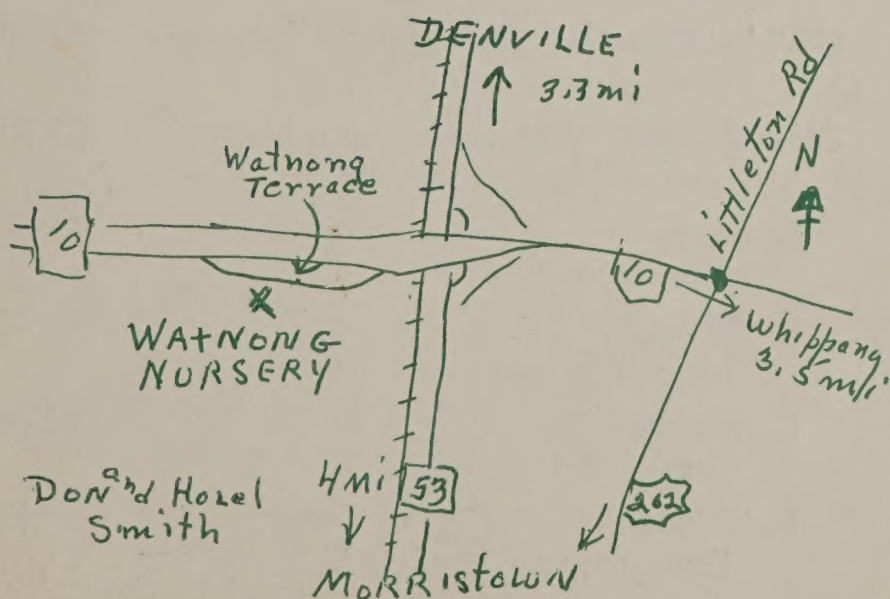

Offers the Unusual
in
Dwarf and Slow Growing Evergreens

We have been collecting and propagating plants for a period of four years. Many of these are now ready for sale. Others still in propagation will not be ready this year.

Most of our plants are being grown in containers and can therefore be moved from March through October, without disturbing their roots.

We do not ship plants. You are welcome to visit our nursery at any time. To make sure that one of us will be free to show you plants it would be wise to call or write for an appointment. Since quantities of most plants are limited, please feel free to ask about available sizes of those in which you are interested.

TO LOCATE US

All plants are evergreen except those preceded by (d.)

Dwarf and Slow Growing Evergreens

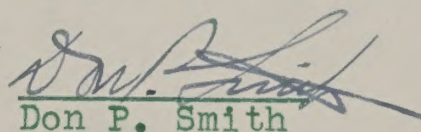

May 27, 1962

Dear Mr. Kozar;

This is our first plant list.

Please note that it includes the dwarf
Burford that you showed me. I also have Nellie
Stevens now.

Sincerely,

Don P. Smith
